DATA ENGINEERING FOR AI

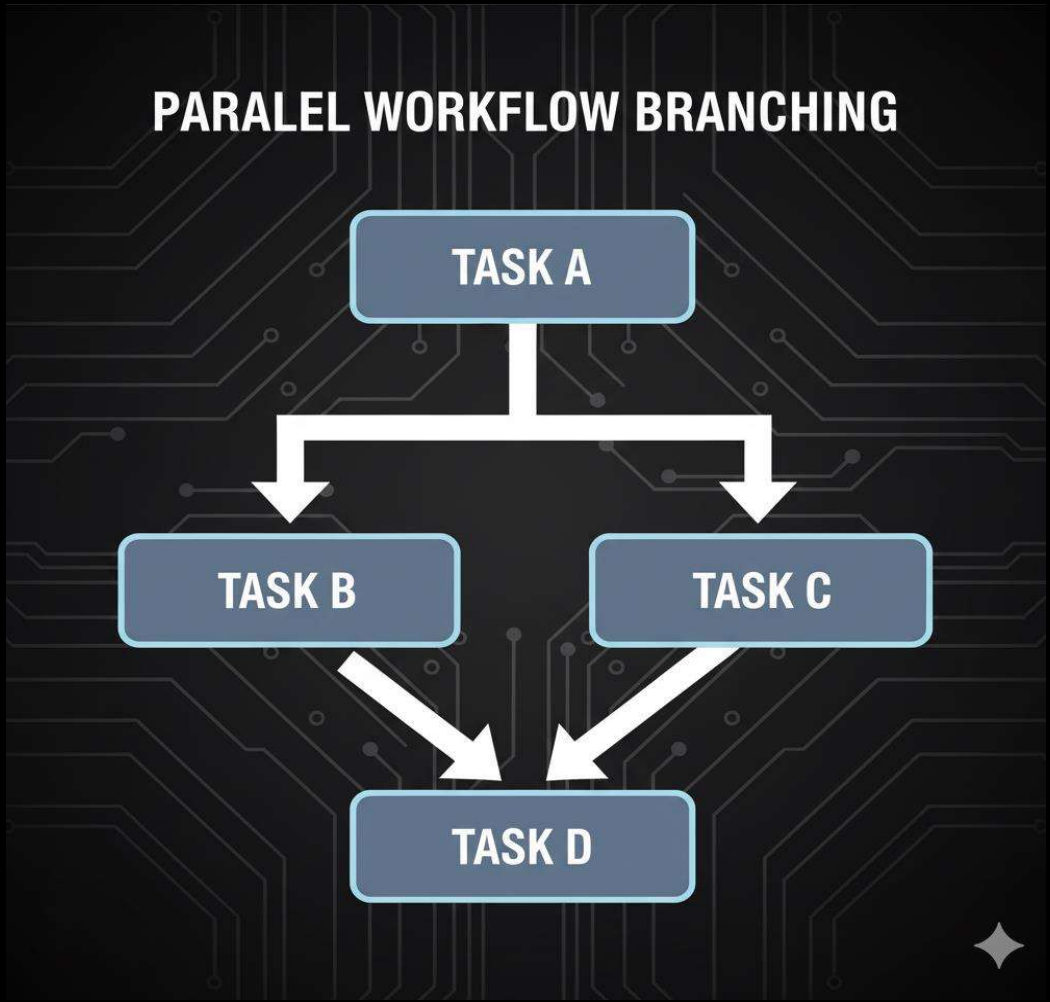
DAY 4

EMMANUEL AKINGBADE

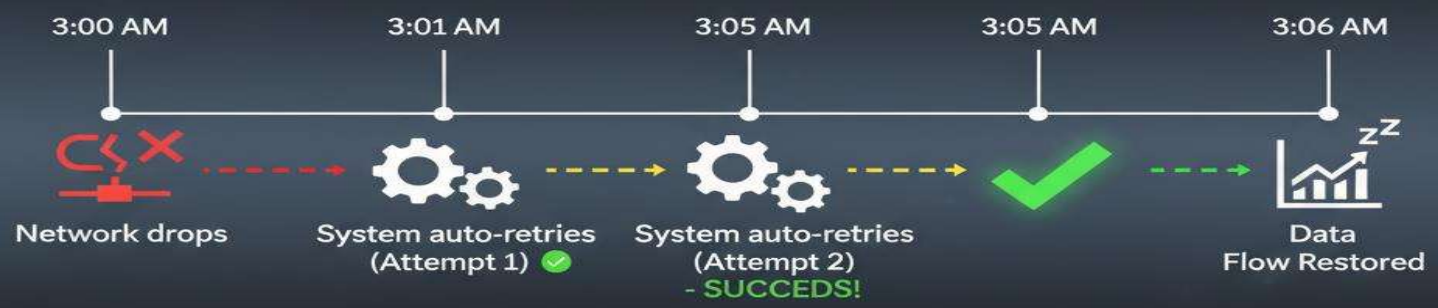
MANUAL (DEVELOPMENT)

AUTOMATED (PRODUCTION)

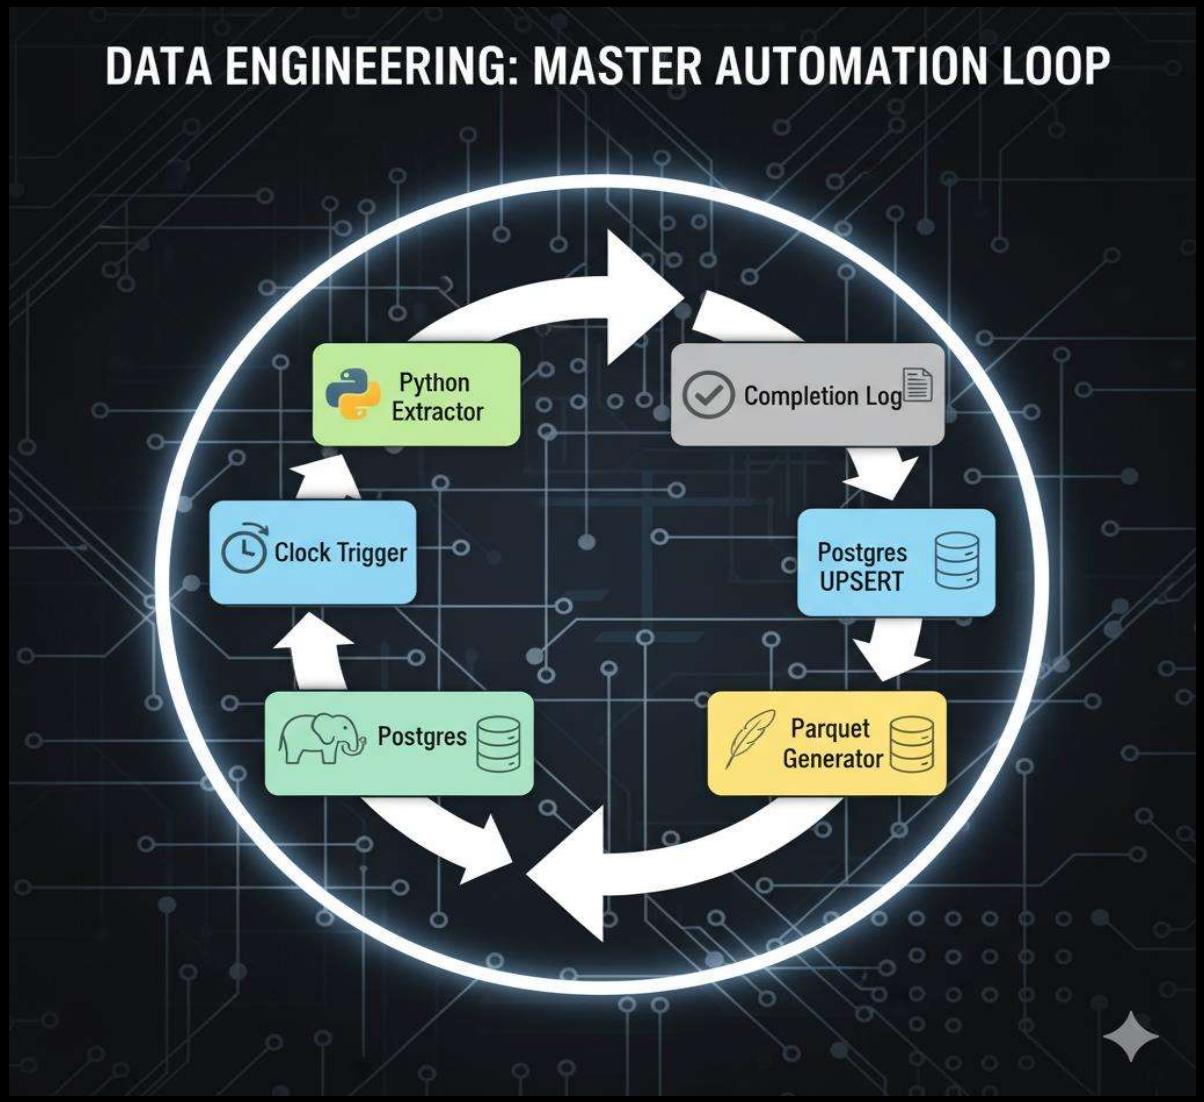
- **The DAG Concept:**
  - *Directed:* The arrows flow in one direction.
  - *Acyclic:* It never loops back on itself (no infinite loops).
  - *Graph:* A network of tasks.



BUILDING RELIABILITY: AUTO-RETRY MECHANISMS



Automated retries prevent data loss and ensure system resilience.



DATA ENGINEERING: MASTER AUTOMATION LOOP
Python Extractor
Completion Log
